

Data Methodology

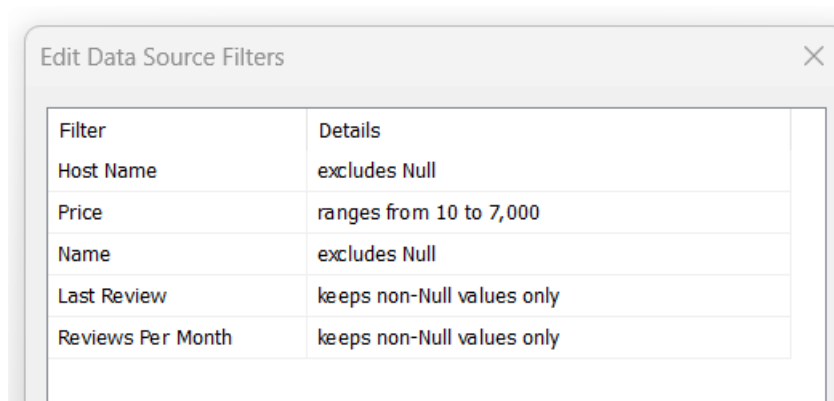

- The below columns has null values hence removed null value rows

Host name

Name

Last review

Reviews per month

The screenshot shows a dialog box titled "Edit Data Source Filters" with a close button (X) in the top right corner. Inside the dialog is a table with two columns: "Filter" and "Details". The table contains five rows of filter rules.

Filter	Details
Host Name	excludes Null
Price	ranges from 10 to 7,000
Name	excludes Null
Last Review	keeps non-Null values only
Reviews Per Month	keeps non-Null values only

- The price column also had lots of \$0 values. Filtered these rows
- Price column had outliers like \$10000 values. Hence filtered the values above \$7000
